Employee Payroll System

Develop a program that calculates the weekly payroll for employees based on the hours they worked and their hourly wage.

Requirements:

1. **Input**:
   - Input the number of employees.
   - For each employee, input their name, hourly wage, and the hours worked for the week.
   - Assume **overtime is paid at 1.5** times the hourly rate for hours worked over 40 hours.
2. **Processing**:
   - Calculate the **total weekly pay** for each employee. For employees who worked more than 40 hours, pay them 1.5 times their hourly rate for overtime hours.
   - Determine the **employee with the highest pay** for the week.
3. **Output**:
   - Display each employee's name, total hours worked, and their total pay for the week.
   - Print the employee with the highest weekly pay.
